

Wings of Fury™

Blaze your way to glory in the proud tradition of fighter pilots of the past.

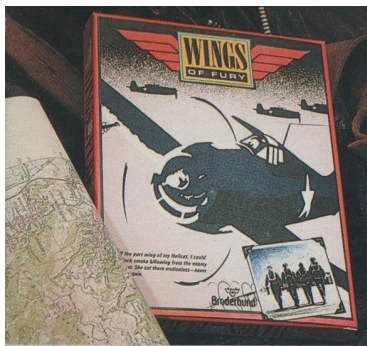

Take off from a WWII carrier and pilot your Hellcat fighter-bomber through Pacific skies, searching out enemy ships and island bases. Use your joystick to strafe, dive bomb and dogfight. Brilliant graphics feature smoke pouring from damaged planes, bullets ripping into the sea, enemy soldiers running from bombed-out barracks! After crippling the enemy's ships with your rockets, you deal the final blow of destruction with torpedoes.

Wings of Fury features remote and close-up views as well as a simultaneous 3-D display from the cockpit. On-screen instruments monitor Fuel consumption and damage and register "kills" for enemy planes shot down. Each stop for refueling and repairs requires a precarious but successful landing on your carrier. This is not just a flight simulator, it's a realistic, action-packed adventure!

The Print Shop

Print your own unique stationery, greeting cards, flyers, and more...

How many times have you realized you need a greeting card after the local card shops have closed? How often have you wished you could design your own party banners, or come up with a truly eye-catching flyer for your local book sale?

Now you can create and print everything from unique birthday cards and party invitations to your own personal letterhead — quickly and easily with The Print Shop. You don't need to be an artist, because our simple menus will guide you all the way.

You'll get to choose from dozens of pictures, symbols, borders and backgrounds, plus a variety of type fonts and sizes. Follow the examples in our illustrated reference manual or create designs of your own. Make changes using the simple text and graphics editing features. The Print Shop even comes with colorful pinfeed paper and envelopes, so you can begin printing your own cards, letters and announcements right away. This best-selling program can help you instantly personalize all of your messages, memos, letters and announcements. And even when the stores are closed, you'll never be caught short for a greeting card when you need one.

"In the beginning there were word processing programs and there were graphics programs. That was the natural order of things.

"Then, the folks at Brøderbund Software introduced The Print Shop, shattering the notion that text and graphics must be separate.

"So computer users began creating posters, signs, letterheads, greeting cards and more."

— RUN
December 1986

CREATIVE WORKSHOP

NEW

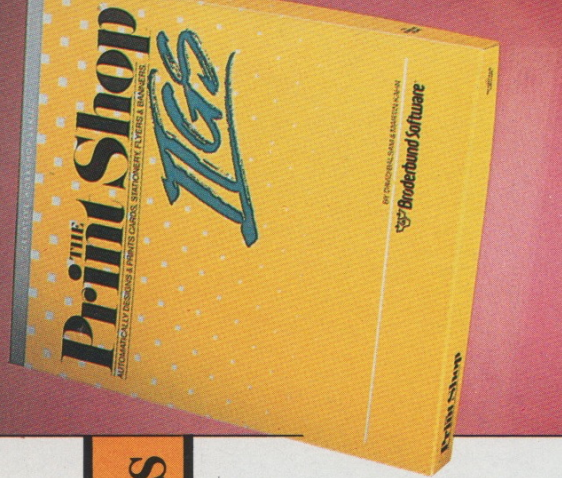

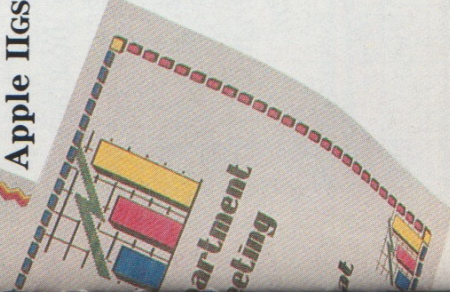

The Print Shop IIGS

Now with two different graphics per page and vertical banners!

Experience the powerful graphics capability of your Apple IIGS with this entirely new version of The Print Shop. It's software as spectacular as your new machine. The Print Shop gives you over 120 unique graphics that utilize the brilliant color and razor-sharp screen resolution of the IIGS. Also included are many dramatic full panel designs. Or create your own designs with our sophisticated Graphic Editor.

You can also use any of the hundreds of designs from The Print Shop for the Apple II, The Print Shop Companion and the many Graphics Library disks. When you're ready, print your creations in up to 8 dazzling colors. A new TRIM feature adds a special finishing touch to your horizontal and now vertical banners. Of course, this new version of The Print Shop also does all the exciting things described on the facing page.

CREATIVE WORKSHOP

Fantavision™

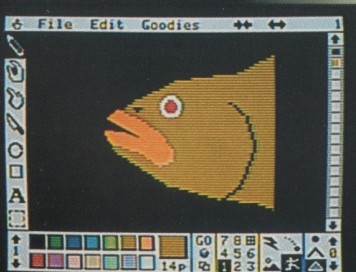

This amazing program makes it possible for adventurous beginners to create colorful cartoons, dazzling special effects and complete motion pictures right on their computer screens.

Named the Apple II "Entertainment Program of the Year" by *Computer Entertainer* magazine, Fantavision brings your simplest drawings to life. Once you've created any two objects or creatures in separate frames (for example, an open hand and a closed hand), Fantavision will automatically generate up to 64 "in between" frames to make your first drawing turn into your second. This technique — called "tweening" — takes professional animators hours to accomplish. Fantavision does it in minutes.

You can make a tree magically turn into a fire-breathing dragon. Bring an airplane

Fantavision for the IIGs (above and right) and the IIe (below) features vibrant, full-color graphics.

1985 BEST ENTERTAINMENT PROGRAM OF THE YEAR FOR THE APPLE II
— Computer Entertainer

in for a perfect three-point landing. Automatic backgrounds offer interesting settings for stories. You can even load high resolution screens from other programs, then add your own animation and text.

Create cartoons, animated letters and greeting cards, even direct your own movies and send them to friends (They don't need Fantavision to run them). Best of all — you have fun, while Fantavision does most of the work.

NEW Special IIGs version.

Completely redesigned to take advantage of the IIGs's extraordinary power, this Fantavision program even offers you a library of digitized sound effects for real motion picture excitement.

Fantavision by Scott Anderson

The Toy Shop®

The computer kit for building mechanical models.

Imagine building a balloon-powered steam engine, or a scale model of the Spirit of St. Louis — using your own computer to create the parts! The Toy Shop gives you all the tools you need to build up to 20 fully finished, working mechanical models. Start by choosing a design from the on-screen menu — anything from a simple model like the

Flying Propeller to a complex creation like the Tractor Crane. You'll then be able to personalize the look of your model by adding custom patterns, graphics and text to individual parts. When you're ready, print out and mount the precision parts on the special adhesive cardstock provided. To help finish your models, your package comes with wire, wooden dowels, rubber stripping, cotton cord and balloons.

Illustrated instructions help you every step of the way. The Toy Shop will provide hours of skill-building fascination for adults and teens age 12 and up. And when you're done, you'll have a whole collection of impressive working models to display in your home (or to give as very special gifts).

The Toy Shop by Jim Calhoun

- 20 working models.
- Illustrated, easy-to-follow instructions.
- Comes with all the supplies you'll need to get started right away.

Dazzle Draw™

Create dazzling artwork in 16 colors and 30 patterns.

Draw a single butterfly in all of its glorious color and complexity. Paint a bold, simple abstract design. Re-create the intricate lines and shadings of the immortal Mona Lisa. Do it all with Dazzle Draw.

Start by choosing from a wide range of brush widths and shapes to paint or draw bold and delicate lines. Then, using a palette of 16 brilliant colors (which can be mixed to create even more), you can

“flood fill” or “spray paint” any part of your drawing with a dazzling variety of textures and patterns. Go ahead and cut, paste, or edit your work — it’s easy to do. You can even stretch or shrink geometric shapes to any size, and work in units as small as one tiny pixel at a time.

Beginners will find themselves turning into instant artists. Professional designers will be able to produce sophisticated, high-quality graphics, prints and slides. Double-high resolution provides extraordinarily crisp detail on your Apple IIc or 128K IIe. Use Dazzle Draw with your mouse, joystick, KoalaPad™ or Apple Graphics Tablet™.

Animate™

With Animate, you could be the next Walt Disney.

Ever wished you could create your own cartoons, shows and movies without having to use a lot of high-tech equipment? Now you can. Animate lets you take your detailed drawings and designs (including those you created with Dazzle Draw) and turn them into exciting double-high resolution animations, complete with sound and text.

Using our illustrated guide, “The Art of Animation,” you’ll be able to create wonderfully lifelike characters and backgrounds (up to 16 characters in any scene). Special animation tools will handle most of the hard work. We’ve included several predrawn objects and backgrounds that you can turn into cartoons, flip books, movie disks to send your friends (they don’t need Animate to run them), self-running demonstration disks — even use them in your own programs (programming guide included). Pull-down menus, windows, and preview and edit features make Animate easy to use for beginners and professionals alike.

 BEST PRODUCTIVITY PROGRAM
 FOR THE APPLE II**

— Computer Entertainer

PRODUCTIVITY

MemoryMate™ NEW

Imagine tossing all your notes and files into a huge desk drawer. Then magically discovering that every time you want something, it's right on top.

We call it MemoryMate. A new breed of data manager that reduces your paper clutter and takes the mess off your desk.

Enter anything into MemoryMate (up to 60 lines for each entry) and every single word, phrase and date is automatically indexed. And cross-indexed. Allowing MemoryMate to find that entry fast — by using any word, date or phrase in it. You can search 180K on a PC XT in three seconds!

MemoryMate also lets you forget all your deadlines and to-do lists. Because it reminds you with on-screen tickler messages that pop up automatically on days you select. Since MemoryMate is memory-resident, it's always there, ready to be accessed at the touch of a key.

So is a better memory worth \$69.95?

Much more, according to PC Week: "(MemoryMate)* is already worth far more to a professional who works with unstructured data than any \$700 database management package." So order it today. Before you forget. After all, you don't have MemoryMate to remind you. Yet.

"A new masterpiece... (Now) I can always find things when I need them. Five gold stars for this one."

— BYTE

"Once in a while a program comes along that makes you wonder how you ever lived without it."

— Lotus

"...A great way to store...any pieces of information that you may need at a moment's notice."

— Los Angeles Times

VIEWGRAPH

Business Week's Business Advantage™

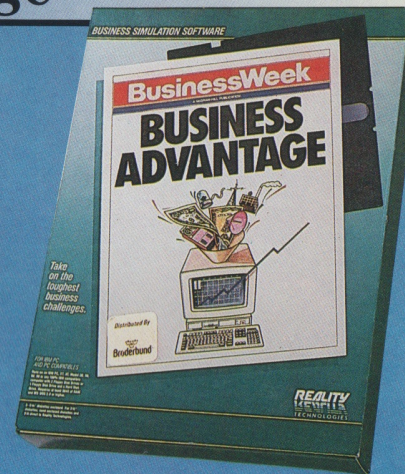

Developed and published by Reality Technologies

Put yourself in the CEO's chair with this real life simulation.

Suddenly, you're CEO. Your decisions spell success or failure. Using real training techniques from companies like IBM and AT&T, and real events from the pages of *Business Week*, Business Week's Business Advantage teaches you tough lessons you won't learn in school. You'll learn by doing. And by making mistakes.

Taking into account all the factors — the competition, the economy, the markets, and the products — you must develop a strategic plan that will lead your company to success.

A built-in Expert Insight feature analyzes the outcome of your decisions. So you'll know what happened and why. Sharpen your business skills with this tough, interactive teacher.

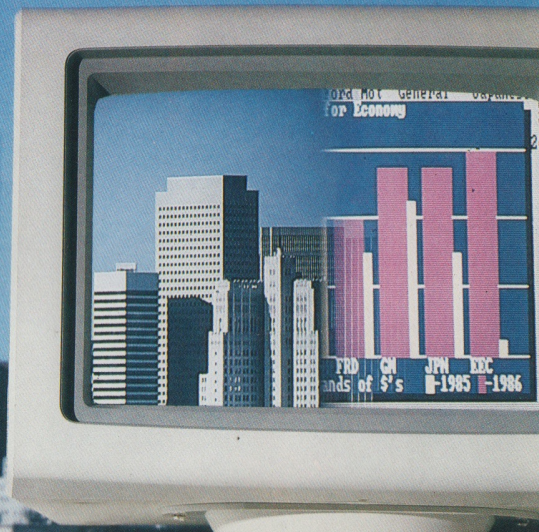

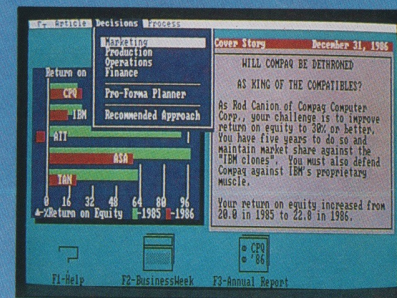

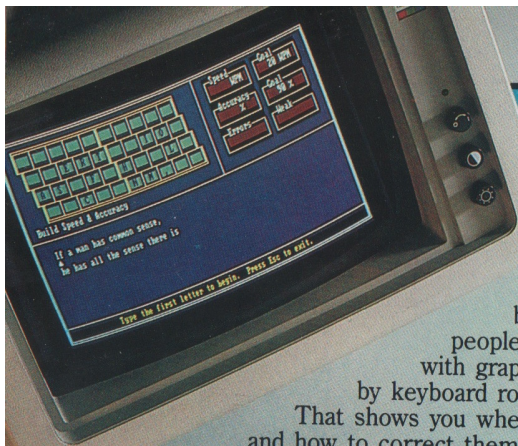

Business Week's Business Advantage

PRODUCTIVITY

Type!™

Learn to type quickly, accurately & for keeps.

Imagine having an intelligent, responsive typing program that is based on scientific research on how people learn to type. That shows you, with graphs, how you're improving by letter, by keyboard row, by hand, even by each finger. That shows you where your most common errors fall — and how to correct them. You get these advanced diagnostics and more with Type!

Using Type! is like having a personal typing coach right at your side, whether you're a novice or just looking to improve your skills. You'll get constant feedback and suggestions about which exercises to try next. Best of all, the exercises are lively and entertaining. Instead of boring, ineffective random letter drills, Type! uses complete words and sentences that capture your attention and do a better job of building your typing skills.

Type! is designed to teach your whole family — or department — or classroom — how to type. Each person can store their individual progress reports. Each of you can even create custom drills to help you learn to type special words or names you use frequently.

Type! is the last typing course you'll ever have to take.

Type! by Soft Press

PRODUCTIVITY

On Balance™

Finally — an easy way to manage your money.

On Balance is truly the easiest way to manage the money side of life. In the time it takes to write a check and record it in your checkbook register, you'll be using On Balance to record and reconcile bank and credit card transactions, as well as to create and track budgets, print custom reports — even print checks.

With On Balance, there is virtually no set-up time. You simply create accounts instantly — as you enter your records. Recurring transactions are entered just once — On Balance warns you when they are due and will update your records automatically. Reports on Net Worth, Net Income, even specific searches on check numbers, dates, payees, flags, or amounts are returned in seconds.

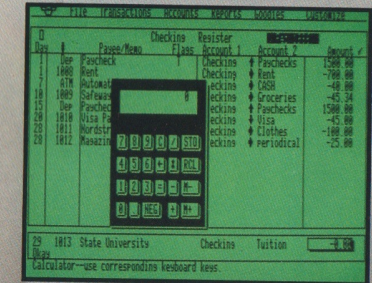

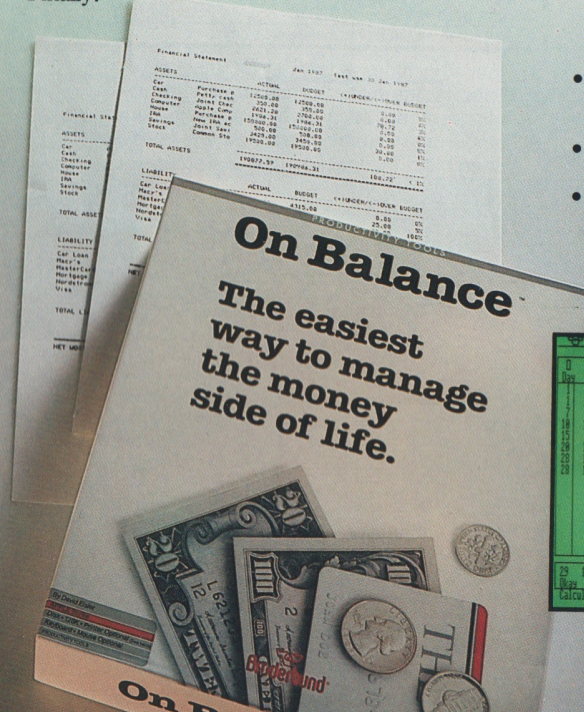

On Balance is very easy to use. The user's manual even offers detailed examples and a chapter on "Principles of Home Finance." It's a fast, easy, accurate way to keep track of your money. Finally!

- Records up to 800 transactions a month, and lets you "flag" special items (like tax-deductible expenses).
- Exports to AppleWorks, providing spreadsheet capability.
- Offers pop-up calculator and note pad.
- Supports 5 1/4" and 3.5" disks. Not copy protected.

Thinking Cap™

Write better book reports, term papers, memos and speeches.

It's tough enough to be faced with the task of having to produce a finished document. It's even worse when you find you can't get started, because you're having trouble organizing your thoughts.

Now Thinking Cap can help you. It lets you jot things down randomly, then it turns your notes into a polished, coherent progression of ideas.

The way Thinking Cap works is simple. You start by typing in your main topic, then listing all of the ideas you have about that topic. When you're through, Thinking Cap helps you organize them into a clear, logical pattern of thought.

Now you have a perfect outline, which you can turn into a beautifully organized final draft. Built-in text editing makes it easy to do without having to use a word processor.

The next time you get stuck before you start, try Thinking Cap. It makes a world of difference in the quality of your thinking and writing.

ForComment™

Who said what when?
Let ForComment figure it out.

Imagine asking 15 people to give you their comments on a single document — and getting their replies automatically collated, neatly filed, and correctly dated. ForComment lets you do it — without messy papers and without confusion.

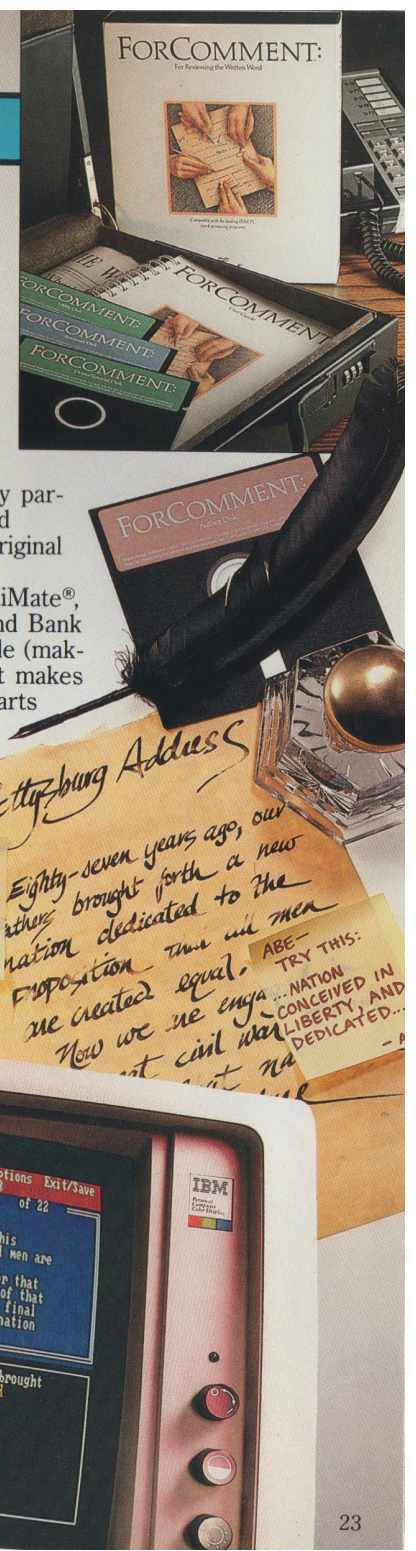

This innovative program can be used on a network. Or respondents can communicate via modem. You can hand one disk around — or give everybody his or her own disk. Once every participant has had his or her say, you can pick and choose which changes to incorporate into the original document.

ForComment accepts files in WordStar®, MultiMate®, WordPerfect®, Microsoft Word®, Volkswriter®, and Bank Street Writer Plus™ formats — or any ASCII file (making it compatible with most word processors). It makes life so convenient that once your department starts using it, you'll wonder how you ever did without it.

Bank Street Series

A new, greatly enhanced version of our best-selling word processor.

When the original Bank Street Writer® appeared, it was hailed as the first genuinely easy-to-use word processor. Adults who bought it were amazed to find that even their children could learn to use it in no time.

Now we've developed a more advanced version of this runaway best seller. Bank Street Writer Plus™ contains all the easy-to-use features of the original version, and more. It lets you create single-key "short-cut" commands so you can skip over certain menus and prompts. It allows you to set up function keys to make your own multi-step commands. And it has a 60,000-word automatic Spelling Corrector and an on-line Thesaurus.

Writing became easier with Bank Street Writer. With Bank Street Writer Plus, it just became a joy.

How would you like to personally lead an army into battle

against the great Genghis Khan? Or try to outfox that master military strategist, Alexander the Great? Now you can pit your own intelligence and skills against eight of the most brilliant military minds in history. The Ancient Art of War lets you plan and carry out military campaigns right down to the last detail...while your enemy conducts a historically authentic campaign against you.

Choose your own armies, weapons, battle formations. Then begin making your decisions — to attack the enemy directly, cut off his supply lines, or take him by surprise. Using detailed maps, you can replay any of 11 historical and fictitious battles. Or you can create your own campaigns with thousands of variations, guaranteeing that this program will never end up at the back of your diskette tray.

When you think you're ready, try challenging the legendary Sun Tzu, the ancient Chinese general who literally wrote the book on war. It will be an experience you won't soon forget. (IBM version requires graphics adapter card. Joystick is optional.)

ENTERTAINMENT

The Ancient Art of War at Sea™

If you think fighting on land is a challenge...

The waves are pounding against your ship...you're getting your weapons ready for battle...when suddenly — attack on the starboard side! As you send your men racing to their battle stations, you'll be planning your defensive strategy with lightning speed. Your enemy: any one of five of the world's most brilliant naval commanders, including the bloodthirsty pirate Blackbeard, the "Yankee Pirate" John Paul Jones, and the legendary Admiral Lord Nelson. Your mission: To sink his ships before he sinks yours.

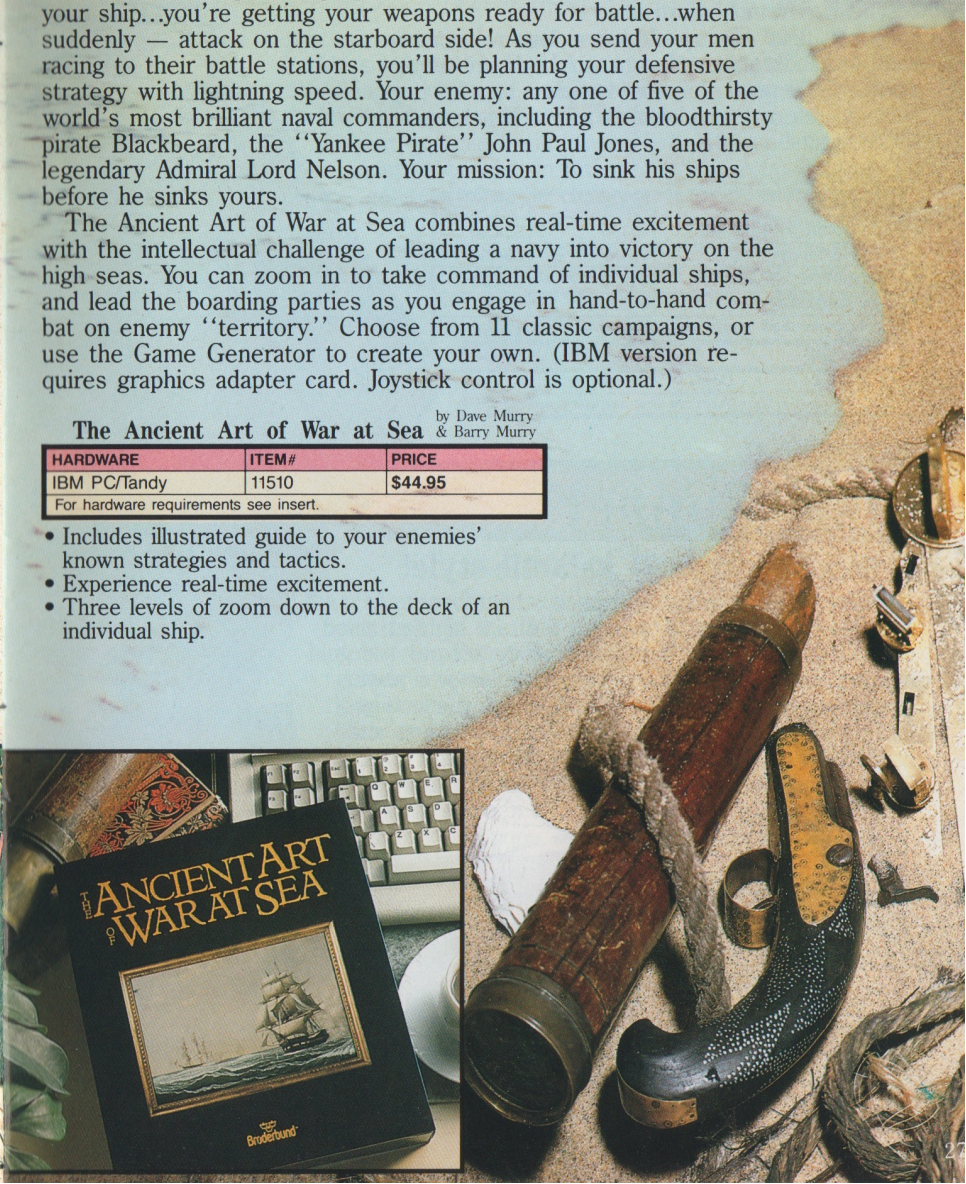

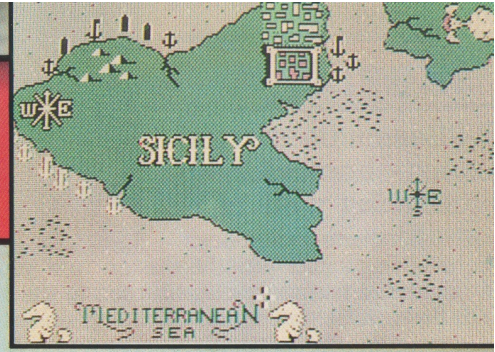

The Ancient Art of War at Sea combines real-time excitement with the intellectual challenge of leading a navy into victory on the high seas. You can zoom in to take command of individual ships, and lead the boarding parties as you engage in hand-to-hand combat on enemy "territory." Choose from 11 classic campaigns, or use the Game Generator to create your own. (IBM version requires graphics adapter card. Joystick control is optional.)

Karateka[®]

Become a martial arts hero without leaving your chair.

For years you've been studying karate with the master. Now you return home to find your village burned to the ground. Even worse, your bride-to-be is a prisoner of the evil warlord Akuma. You cannot rest until you rescue her from his fortress.

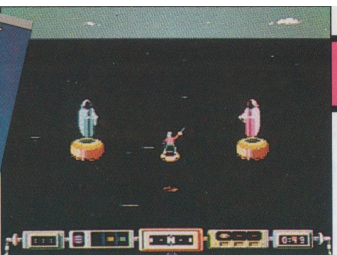

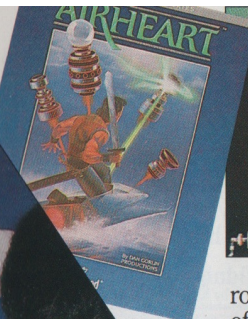

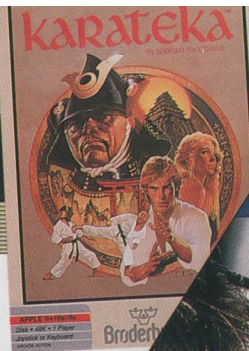

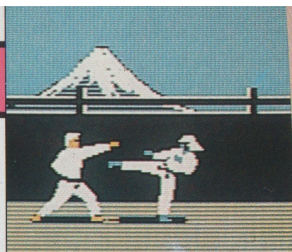

As you fight Akuma and his vicious warriors in hand-to-hand combat (using your keyboard or joystick), you'll need skill and discipline to win. If you succeed, eternal happiness is yours. If not, certain death awaits!

Airheart[™]

The ultimate 3-D search-and-rescue adventure

Somewhere over a boundless sea, guarded by formidable robots, sleeps a young prince whose rescue means the rebirth of world peace. Only the best and bravest pilots have won the right to be called Airheart. Do you have the right stuff?

It won't be easy. You'll have to prove yourself worthy before you can even think about saving the prince. You'll encounter ruthless enemy robots and search the endless oceans in an amazingly quick and maneuverable jet-powered sled that hovers above the water's surface.

Spirit guardians will present you with specific tasks you must accomplish in order to fight the final battle. Then get ready for the challenge of a lifetime! Dazzling double-high resolution 3-D graphics make this arcade adventure so realistic your head will be spinning by the time you're through. If all goes well, you'll have earned the hero's title — Airheart.

Cauldron[™]

Juice of toad, eye of newt...

This spooky adventure is really two action games on one disk. In the first game, you're a witch who must defeat the Pumpking in order to regain the powerful golden broomstick. In the second game, you're a pumpking warrior, out to destroy the evil Witch Queen. In both games, the only way to defeat your opponent is to brew a magic spell in the seething Cauldron. You'll need juice of toad, eye of newt and maybe a lock of the witch's green hair. Will you ever reach the Cauldron? We hope so — or else...

Turn your Macintosh into your own private tutor with Sensei™ software.

Sensei (SEN-say) is Japanese for "teacher" or "master." Using the animation capabilities of your Macintosh, Sensei programs present material in intriguing, interactive ways to help students achieve mastery of key concepts and better their performance on homework and on tests.

EXPLORATIONS

Geometry™

Now you can excel in a difficult subject.

Here is a unique, enjoyable way to excel in geometry, whether you're just beginning the subject or already halfway through the course. This powerful program lets you experiment "hands-on" by making abstract theorems come to life on your screen.

For example, you can actually create and move angles yourself in order to test the theorem that the sum of the angles of a triangle is 180 degrees. Working at your own pace, you master an entire year's materials this way — reviewing, practicing and testing as you go along. Like a good private tutor, Geometry always offers you help if you get stuck.

Watch your grades improve rapidly as you use this program to further your understanding of a fascinating subject. Teachers will even enjoy using Geometry to illustrate complex theorems.

- 16 suspects, 50 states and 1,500 clues.
- Learn American geography and history.
- As challenging for adults as for children.

EXPLORATIONS

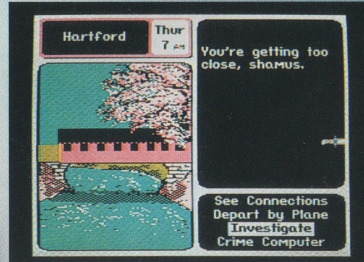

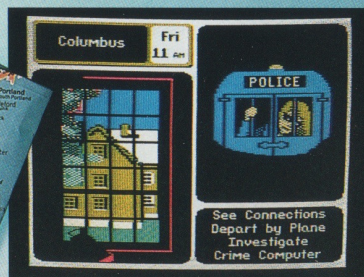

Where in the USA is Carmen Sandiego?™

Track this master thief across the United States!

Master thief Carmen Sandiego is on the loose and out to steal some of our most precious national treasures. Her gang of eccentric con artists has grown bigger and more outrageous than ever. Can you catch them?

You'll start by gathering all the facts at the scene of the crime. Then you'll be off on a wild chase across all 50 states and the District of Columbia. As you travel north, south, east and west, you'll learn about America's cities, coastlines, mountain ranges, lakes, deserts, history, and more. To help you, the program includes Fodor's® USA travel guide — and you'll need it!

Sixteen suspects, 50 states, and 1,500 clues will keep you busy for a long, long time as you work your way up through 10 detective ranks. The more you play, the more challenging the clues become, truly testing your detective skills — and the more knowledge you'll have about our fascinating history.

EXPLORATIONS

Where in the World is Carmen Sandiego?®

This fun game is also a great teacher!

When last seen, the auburn-haired ex-secret agent was heading for Istanbul — or was it Cairo? You'll have to figure it out yourself, and that's where the excitement lies in this thrilling game of pursuit — and capture. You'll follow Carmen and her gang of master thieves all over the globe as you decipher clues using your Crime Computer and your World Almanac (book included).

Along the way, you'll also pick up interesting information about the geography and culture of countries around the world. And you'll become a seasoned detective, advancing from rookie to sleuth to ace as you solve more and more cases involving Carmen and her gang.

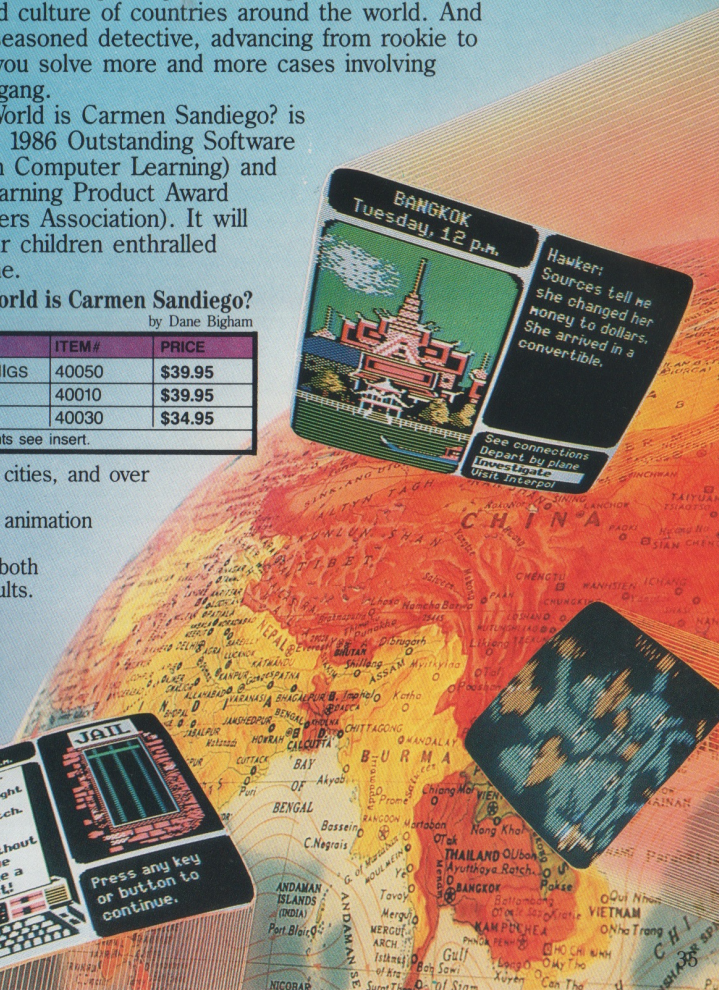

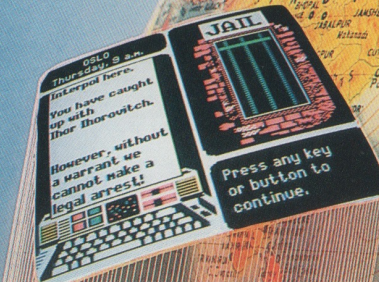

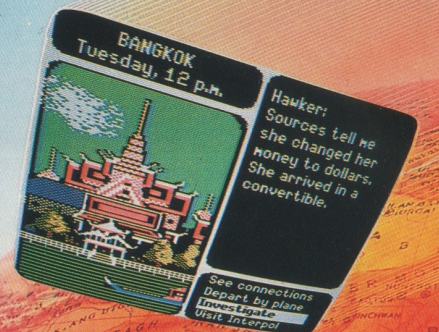

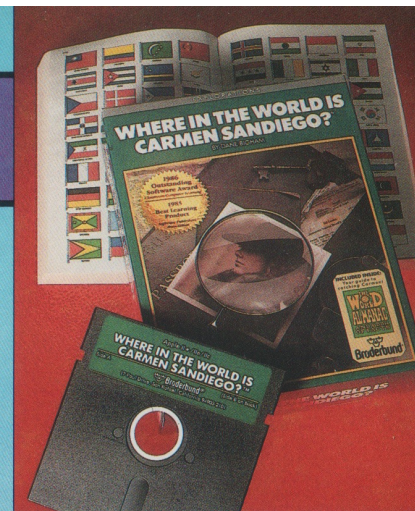

Where in the World is Carmen Sandiego? is the winner of the 1986 Outstanding Software Award (Classroom Computer Learning) and the 1985 Best Learning Product Award (Software Publishers Association). It will keep you and your children enthralled for hours at a time.

Science Toolkit™

A basic science kit for the whole family — or school.

What do a radiator and an elephant's ear have in common? The Science Toolkit Master Module lets you answer this and many other fascinating scientific questions. It actually turns your computer into a working scientific instrument that is easier to use and more precise than other, more expensive programs. Light and temperature probes plug into the Toolkit's interface box and work with the highly accurate on-screen timer, thermometer, light meter and strip chart recorder. Data tables can be printed to show values and time intervals. The program's speed means you don't wait long for results, and outstanding graphic displays help you visualize variations. A special school edition (including a back-up disk and Teacher's Guide) is designed for classroom use. The Master module is the core of the Science Toolkit series and is required by the companion Lab Modules.

Wings of Fury™

Blaze your way to glory in the proud tradition of fighter pilots of the past.

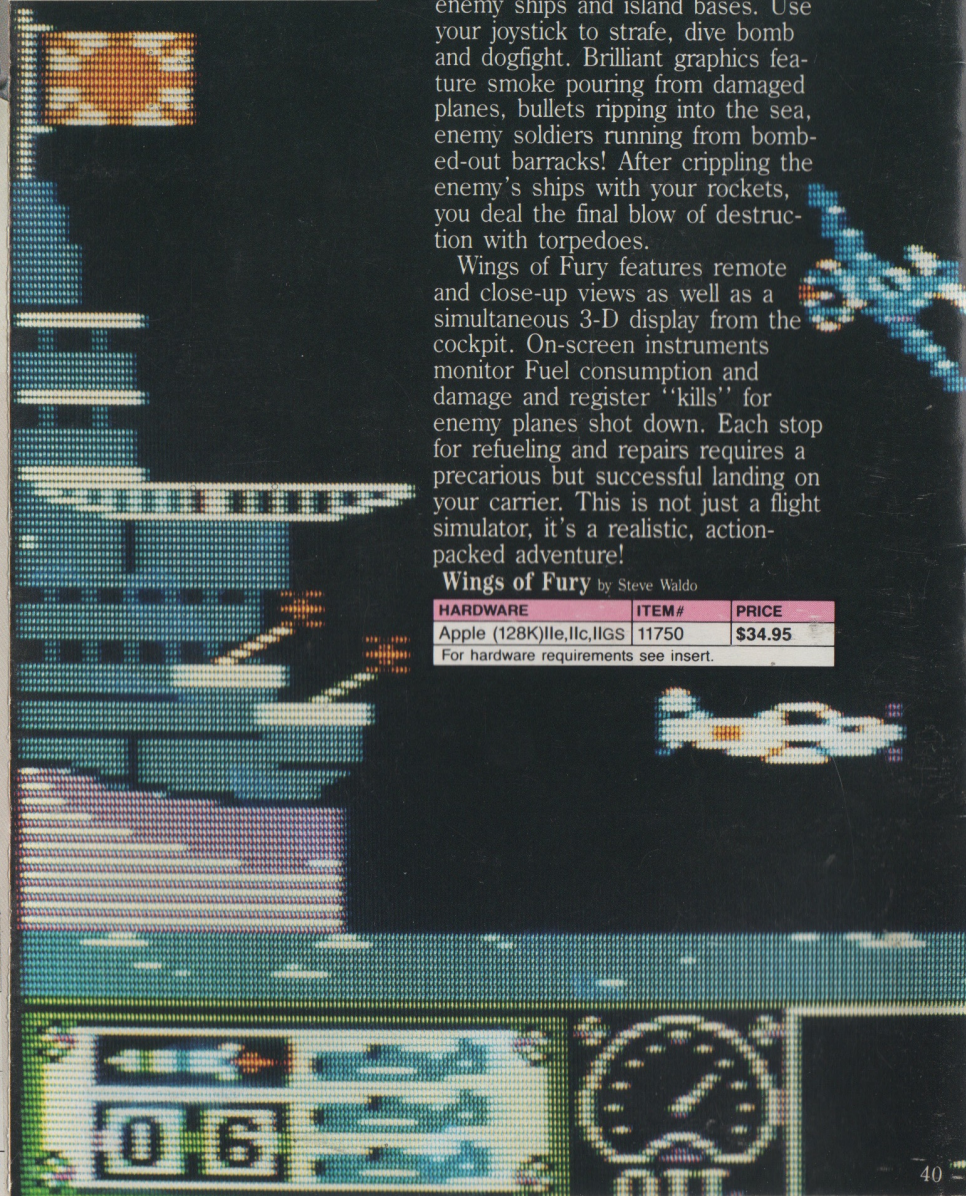

Take off from a WWII carrier and pilot your Hellcat fighter-bomber through Pacific skies, searching out enemy ships and island bases. Use your joystick to strafe, dive bomb and dogfight. Brilliant graphics feature smoke pouring from damaged planes, bullets ripping into the sea, enemy soldiers running from bombed-out barracks! After crippling the enemy's ships with your rockets, you deal the final blow of destruction with torpedoes.

Wings of Fury features remote and close-up views as well as a simultaneous 3-D display from the cockpit. On-screen instruments monitor Fuel consumption and damage and register "kills" for enemy planes shot down. Each stop for refueling and repairs requires a precarious but successful landing on your carrier. This is not just a flight simulator, it's a realistic, action-packed adventure!

Director Series

CREATIVE WORKSHOP

COMING SOON!

Director Series™

Paint it with Art Director.™ Then Film Director™ brings your still life to life!

So professional, our competitors use them to create their game animation! So easy, you can too!

Art Director uses all the power of your Atari ST to create dazzling works of art. All menus and icons appear on screen as you paint, so it's even easy for beginners. Experienced artists are inspired by the power and advanced tools. Paint 16-color masterpieces from a palette of 512 colors. Included are unique features like RESCALE, STRETCH, BEND and BULGE. And color

cycling to give you the illusion of movement.

Film Director turns Art Director drawings into action-packed movies. It's

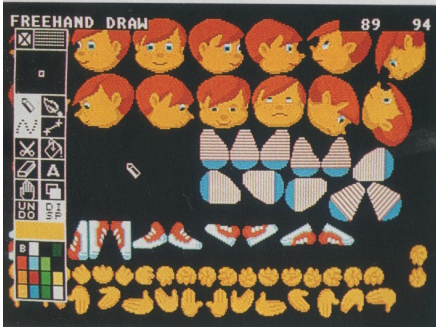

the premiere animation program for the ST. Our competitors use it! We use it to create fantastic graphics for our entertainment programs. Nobody else offers you cel animation like this. Metamorphic (automatic animation) too. There's even a library of music and sound effects. Both programs come as a bundled package for a price you'd expect to pay for a paint program alone!

- Pull-down menus and icons (available on screen) make it easy.
- Fastest "brush" in the business.
- Together they create truly professional game graphics and movies.

Director Series by Andromeda Software

HARDWARE	ITEM#	PRICE
Atari 520ST,1040ST	25925	\$79.95

1 Producing brilliant graphics is a snap with Art Director. It's also the perfect way to create animation stills for use in Film Director.

2 Film Director makes it easy to do animation by automating many of the repetitious steps required by traditional types of animation.

LM FILE EDIT OPTIONS

CREATIVE WORKSHOP

VideoWorks II™

Developed and published by Macromind® Inc.

Say good-bye to boring business and classroom presentations.

VideoWorks II brings business or classroom presentations to life. Sophisticated animation like this adds impact and memorability to your presentations.

Create your own moving pictures using the built-in editor. Or import drawings from many Macintosh application programs. Add music or sound effects, too. Scroll and move your text for added emphasis. Enjoy VideoWorks II for its sheer entertainment value alone.

This is a highly upgraded version of the same software used by firms like Disney and Lucasfilm. But now more powerful and simple so anyone can use it. If you wish, you can let the program do the animation automatically. Create up to 24 "tracks" of animation on a single screen at the same time. You even get full color capability for the Macintosh II. Order this revolutionary tool today and your next presentation will be remembered and talked about for many days to come.
