Animation Station®

Computer Design Pad & Graphics Program

Unleash your creativity with Animation Station, a powerful visual communications tool. Suncom's classic utility for generating all kinds of graphics on your personal computer, Animation Station replaces keyboard, mouse, joystick or paddles.

Move the stylus or your finger across Animation Station's surface and the computer follows you across the screen in any of hundreds of colors. "Built-in", pre-drawn pictures give you a head start on your creations. Automatic generation of circles, ovals, squares, boxes, straight lines, typography and other geometric shapes give you all the tools of a self-contained, electronic drafting room.

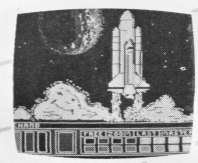
As an education aid, Animation Station makes classroom presentations up-to-date, vibrant and visually interesting. Replaces the dull, monochromatic chalkboard with full color electronic graphics that bring attention to any subject in the schoolroom, lecture hall or boardroom.

Bring out the best of your computer's capabilities while bringing out the best in yourself with Animation Station.

For Apple II, II+, IIe, IIc; Franklin; Commodore 64, 128; Atari 800, 130XE

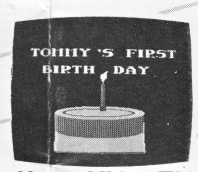
Education

Great for adult, child and business education. Combines type and graphics for more exciting lessons.



Computer Art

Draw in many colors with built-in geometric and pre-drawn shapes. Control all the tools of a self-contained, electronic art studio.



Home Video Titles

Use your video equipment for making home movies or A/V presentations? Animation Station easily connects for great titles & graphics.

Print Out Your Creation

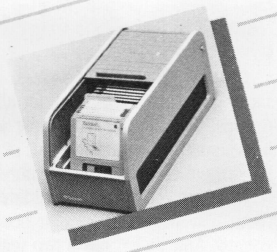
"Printer Dump" feature lets you have a "hard copy" of your work using many popular printers.*

*See side panel of unit box for specific compatibilities.

New Products

Diskit™

Magnetic Media Storage System

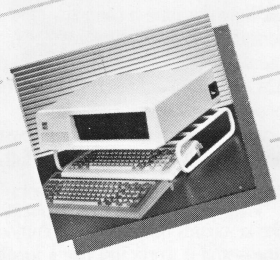


After keying in data for hours, don't you want to be sure your work is protected? We've created The Diskit System so your data won't dump and your code won't crumble.

Classically elegant roll-top design combines with a sturdy, practical and professional design. Micro**Diskit**30™ holds thirty 3.5″ disks. Sixty 3-and-a-halfers fit into Micro**Diskit**60™ You can store fifty 5.25″ floppies in Floppy**Diskit**50™ and one hundred 5.25″ disks in Floppy**Diskit**100™.

MicroStation™

CPU Stand



Make your keyboard disappear. Not permanently, just while it's not in use. MicroStation opens up the workspace taken up by your keyboard for other activities, like reading, writing, even 'rithmetic. Made of extra heavy duty steel tubing and vinyl clad for added protection, MicroStation makes your desk more efficient. New, from Suncom.

PQ The Party Quiz Game®

Family Learning System Hardware + Software

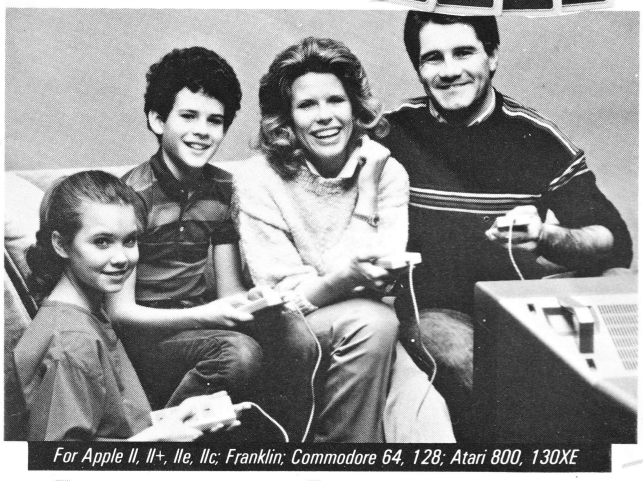
Discover a new way to learn while you play.

We've created a new, unique hardware/software system like nothing ever produced for home computers. PQ allows up to four people to play *simultaneously*, having tons of fun while learning thousands of useful facts about the world.

Each PQ package contains four special "paddle" controllers (one for each player), Program Disk, and a Question Disk covering The Arts, History, Sports, Science, Geography and Entertainment. PQ asks the players a question and all are allowed to respond at once. Points are awarded for correct answers which are displayed on-screen after time elapses. Varying levels of speed and difficulty may be adjusted to allow for players of all ages and education levels, from reading age on up. "Lightning Bonus Rounds" interspersed between standard play vary the pace and add excitement.

Find out for yourself why *Family Computing* and the *San Francisco Chronicle* each gave PQ a 4 star rating.

PQ. You won't believe it 'til you play it.



For Apple II, II+, IIe, IIc; Franklin; Commodore 64, 128; Atari 800, 130XE

★★★★

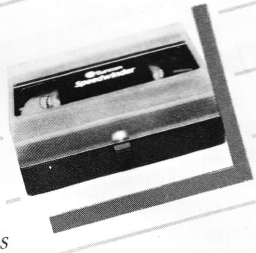
Speedwinder VHS™

The Perfect Ending For Every Show



Have you ever replaced a motor or the recording heads on your VCR? If you have, you know that the same money would rent a lot of movies. Speedwinder lets your VCR's motors do what they were designed for — record, playback and nothing else.

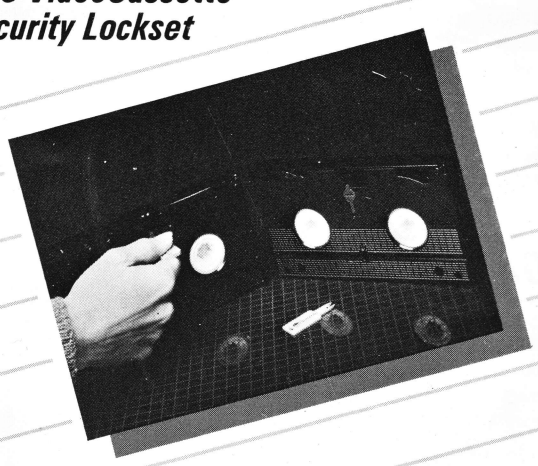
VCRs use expensive *synchronous motors* for all their functions, including rewind and fast forward. Why are such precision parts used for such imprecise functions? Because they are there. And up until now, you've not had a choice in the matter. Speedwinder gives you a choice by letting you rewind and fast forward *outside* of your VCR. Very compact and portable, Speedwinder runs on batteries and it's just a little bigger than a VHS tape.

Speedwinder inexpensively saves wear and tear on your motors, at the same time minimizing the chance of deterioration of any of the rest of your VCR's costly mechanical insides.

Do you use a portable, battery operated VCR? Speedwinder helps save your battery's charge so it will be available for longer recording periods.

Do you rent movies? If you use Speedwinder to rewind rented cassettes, your local video store proprieter will love you even more. And he'll spend less time explaining things to you because now you know the way the story *should* end. With Speedwinder, The Perfect Ending For Every Show.

VHS VideoCassette Security Lockset



The question is — how do you prevent unauthorized viewings or erasures of videocassettes without storing tapes in a safe? The answer is — Suncom's VideoCassette Security Lockset.

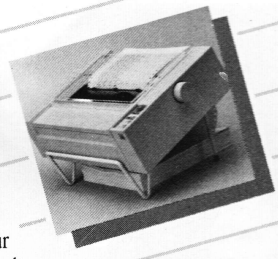
Tiny and inobtrusive, the VHS Lock fits into a small cavity on the underside of all VHS cassettes — and locks with a specially coded key. Once inserted, the lock disappears, so you can store your locked cassette in any standard tape album, sleeve or cabinet.

Locking one cassette costs a fraction of the price of a new tape. And that's a lot cheaper than a wall safe.

Suncom

Computer Accessories

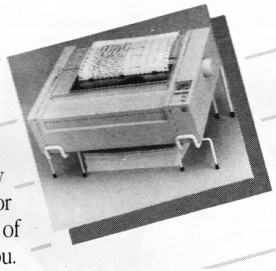
Printer Station™



Can't find a good place to store paper as it feeds into your printer? Can't even find a good place for the printer itself? Suncom's line of space saving printer stands really gets you organized.

As Printer Station raises your printer off the work surface and angles it for easy viewing, new space opens up *underneath* the printer for convenient, uncomplicated paper feeding. In 12″, 12″ Hi Profile, 15″, 18″ & 21″ sizes for most popular personal printers.

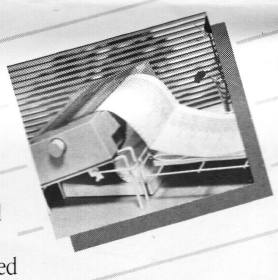
PrinterMate™



One PrinterMate printer stand set fits most sizes of personal computer printers. If you see yourself expanding your system and upgrading your printer in the future; if you're not sure how wide your printer's underside is; or if you have access to a variety of printers, PrinterMate is right for you.

Heavy-duty steel and vinyl coated construction ensures reduced noise and vibration levels and makes your workstation all the more comfortable. Great for portable computers like Compaq and Kaypro, too.

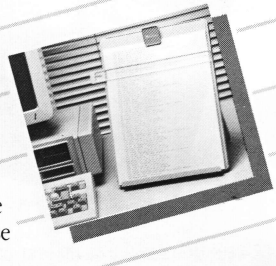
PaperTray



Attaches to the rear of all of Suncom's printer stands as well as most other brands of wire-form printer stands. Receives printed paper as it comes out of printer, helps to neatly fold and stack.

Eliminate the mess of printed paper all over your desk and the floor. PaperTray helps your computer system do what it was meant to do — make your life easier.

DocuMate2™

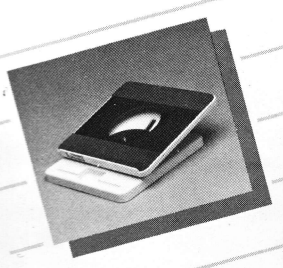


Make the tedious work of reading and copying data into your computer or onto a typewriter easier and less stressful. DocuMate 2 puts your work up on an easel and holds it in place while freeing up desk space to increase efficiency and finish jobs quicker.

Made of durable, lightweight, injection-molded plastic, DocuMate 2 includes extra clips and conveniences not found on most other copy holders. Adjustable ruler keeps you from loosing your place on the page. Great for home, school or office.

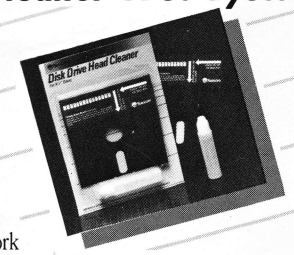
Suncom

Monitor Station



Now you can adjust the position of your computer's monitor — instead of it adjusting you. Suncom's Monitor Station does away with those stiff shoulders and neck pains after long work sessions. While reducing glare from lights, Monitor Station minimizes eye strain by tilting up to 12.5° and swiveling 360° until your screen is at just the right, comfortable angle. For monitors up to 14″ screen size.

Disk Drive Head Cleaner Wet System

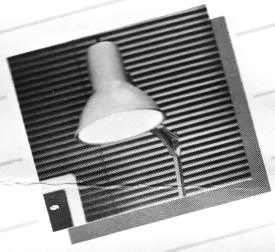


Disk drive heads accumulate oxide and other particulate matter over long periods of use. Suncom's Cleaner System removes dirt, soil, oxide and foreign matter from 5¼″ disks so that you record every bit of valuable data, and get it back when you need it.

The Suncom system does its work with less abrasion, so your delicate and sensitive disk drive heads don't suffer the abuse given them by some other brands.

Treat your disk drive right with Suncom.

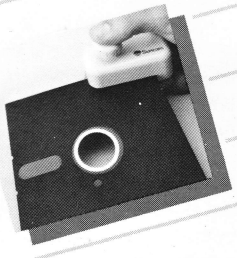
DataLight



Shed a new light on your computer workstation with Suncom's DataLight, Computer Area Lighting Center.

Designed specifically for use in computer environments, DataLight won't harm sensitive materials like the computer's circuitry or recorded magnetic diskettes. Includes compartments for paper clips, pens, pencils and thumbtacks. Comes with a pad of paper contained within its own, separate compartment. Includes heavy-duty, weighted base to prevent tip-over. UL Approved.

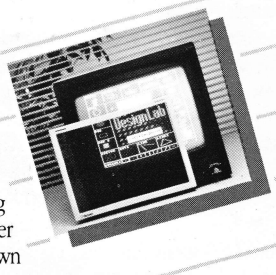
The Notcher



Suncom's Disk Notcher punches out a second notch in 5¼″ single-sided diskettes to provide you with newly found *back-up* storage. Store data in an emergency, back-up work in progress, or make a second copy of that new program, just in case.

Do you have any old, unused programs in your library recorded on notchless disks? Bring new value to them as well, with The Notcher.

GlareDown

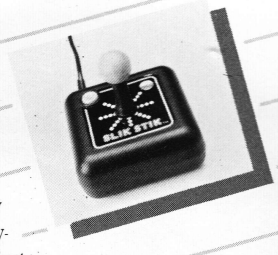


How many times have you had trouble reading your computer monitor screen because of the sun glaring through the window or poor placement of overhead lighting? If you've spent too much time squinting your eyes and craning your neck under these sort of circumstances, GlareDown is for you.

GlareDown greatly reduces or eliminates most stray lighting coming back at you from your monitor screen. Reading becomes easier, eye strain goes down and efficiency goes up.

Joystick Controllers

Slik Stik™



▲ Its price says "buy me". Its convenient, handy size says "hold me". Slik Stik joystick controller for Commodore VIC, 64, 128; Atari Computers and Games.

Suncom's original, patented design ensures long life, reliability and usefullness, whether you're playing games or learning lessons. It's just the right combination of responsiveness, accuracy and economy.

Tac5™

▲ Our innovative MicroSwitch Array Technology makes the difference here. Tac5's design lets us offer what no joystick maker's ever offered before — a LifeTime Limited Warranty.*

You'll see the difference because Tac5 responds so quickly and smoothly that you — your computer and your mind become almost one. You'll ride on a newly discovered edge of technology never dreamed possible before.

Created in commemoration of our 5th anniversary, Tac5 is new and hot — from Suncom.

*See warranty panel on unit carton for specific conditions.

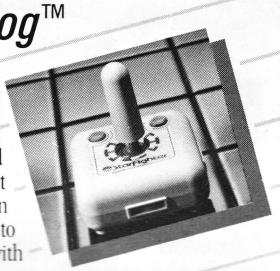
LIFETIME WARRANTY

StarFighter™ C64/128/Atari

▲ The Ultimate Joystick, Suncom has sold hundreds of thousands of StarFighters in the U.S. and across the world. Round-cornered and smooth, StarFighter stays more comfortable to hold over those long playing sessions.

So many customers have written us with compliments of StarFighter, we can't help but think that you'll like it too. 2 year warranty.

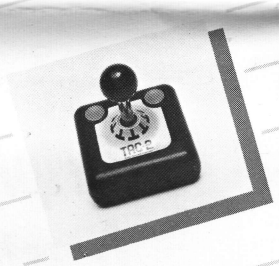
StarFighter Analog™



■ The State-of-the-Art in analog joystick controllers. One model for Apple II series (SFA034), one model for IBM PC series (SFB010). Two extra kinds of fine tuning controls not found on any other joystick. One moving part instead of the twenty or thirty found on other brands make this product easier to use and more reliable. And it comes with Suncom's famous 2 year warranty.

Apple II, II+, Franklin require adaptor, Suncom SFA-1. IBM PCjr requires adaptor.

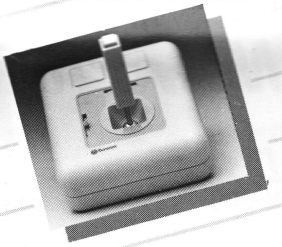
Tac2™



▲ Dealerscope Magazine gave it a 4.3 out of 5. An independent lab tested it to over 3 million moves *without a single failure*. In fact, the lab simply turned off its test fixture, because the joystick refused to break!

Durability combined with quality, responsiveness and control that you expect in a Suncom product make Tac2 the choice for you. For Commodore and Atari computers. 2 year warranty.

Tac1+™



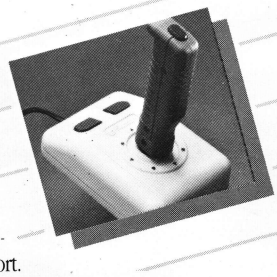
■ Sleek, modern design, independent "X" and "Y" axis controls, handle top fire button and a new, easier to use rapid centering mechanism are all combined in Tac1+ for a truly versatile cursor controller.

Great for graphics and games, Tac1+ is the analog joystick for all reasons. Do you have both Apple and IBM† systems at your disposal, or are you thinking of changing in the future? Tac1+ serves your needs for now and later by being compatible with most popular home computer systems. And Tac1+ has a two year warranty — so you know you'll get what you paid for.

Tac1+. New, from Suncom.

† PCjr requires adaptor, Suncom SFX078.

Tac3™

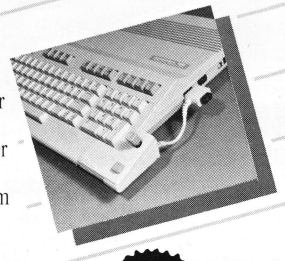


▲ The serious gamers said "Give us a joystick with a pistol grip, a handle-top fire button and microswitch quality". So we did.

Sleek, aircraft-like design; heavy, solid feel and multiple fire buttons combine in Tac3 for increased accuracy, stability and comfort. Just right for your Commodore VIC, 64, 128 or Atari Computer. 2 year warranty.

All joysticks in this column compatible with AMSTRAD COMPUTER and TI99/4A, with appropriate adaptors.

ICONtroller™



▲ Now you have a compact, fully functional joystick always available for use with your Commodore VIC, 64 or 128, right on the keyboard! ICONtroller is perfect for use with the popular Graphic Environment Operating System Software — it lets you save your full sized joystick for gaming.

ICONtroller is custom fitted to enhance the keyboards of the entire Commodore line — and it works just like a joystick on Atari computers too. No cords hanging, easy to reach, quick response — ICONtroller makes your computing easier. New, from Suncom.

Great with GEOS Software

GEOS is a product of Berkeley Softworks

Suncom

■ Compatible w/IBM PC series, Apple II series, Compaq, Blue Chip and most other PC and Apple II compatibles. PCjr requires Suncom adaptor, model SFX078.

▲ Compatible with Amiga, Commodore VIC/64/128, Atari 2600, 800, 130XE and ST series computers.
